

HP Bioremedia

Microbial additive for oily sludge treatment

Microbial formulation for crude sludge management

Effective at high hydrocarbon concentrations

Minimal intervention required

Rapid action, >80%
reduction in oil content

Sustainable and
biodegradable additive

Low cost additive

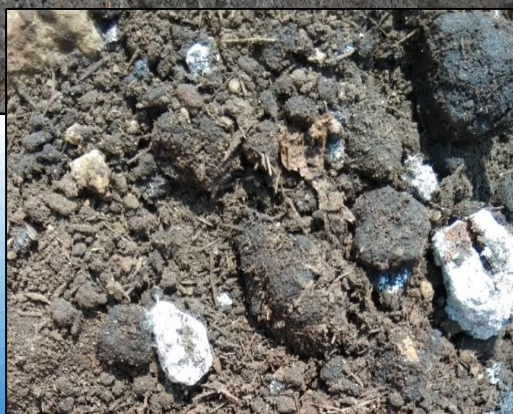

An effective solution for management of crude sludge in
refineries and oil terminals

HP Bioremedia

Microbial additive for oily sludge treatment

- ✓ Highly effective microbial formulation
- ✓ Easily dispersible
- ✓ Minimal intervention required during treatment
- ✓ Robust formulation, withstands most weather conditions

Before treatment

After treatment

Bioremediating sludge for a greener and cleaner future
