

HP Bubbly

A quick gas leak detection liquid

- Leak detecting solution for monitoring of pressurized gas handling systems
- Has been proven to be used for leak detection of various gases like SO_2 , H_2 , N_2 , O_2 , Ar, Compressed air, etc
- Can be used in the wide pressure range of 1.2 to 55 bar

Features

Easy Handling

Biodegradable

Non Corrosive

Works with various gases

Available in various packages

Shelf life of min one year

HP Bubbly

A quick gas leak detection liquid

- Successfully used for commissioning of various Refinery process units

Applied for leak checks during commissioning of HP DAK unit at MR

Flange leak clearance in record time using both H_2 & N_2

Applied for leak checks during commissioning of HP FCHCU unit at VR by M/s Larsen & Turbo

Successful leak check performed in VRMP HGU and certified by M/s TECHNIP ENERGIES
