

# HP CORRMIT LPG

Corrosion Inhibitor for LPG Pipelines

Internal Corrosion in LPG pipelines occurs due to moisture, H<sub>2</sub>S, CO<sub>2</sub>, and MIC

HP CORRMIT LPG bonds with the metal surface, forming a protective film.

Reduced import dependency

# HP CORRMIT LPG

Corrosion Inhibitor for LPG Pipelines

➤ Tuned the formulations to align with LPG pipeline operating conditions

➤ Novel dual functional bivalent film forming and antimicrobial compound

➤ HP CORRMIT LPG integrates molecular novelty with operational utility to enhance safety

## Bivalent Metal Adhesive Protection Mechanism
