

HP NanOKoat

Nano-Additized Paint for Corrosion Mitigation

- In-house Developed NANO Formulation for Corrosion Mitigation Paints
- Corrosion Mitigation under the extreme salty environment
- Elimination of Primer Coat
- Potential Cost Savings
- Demonstration Initiated at Mumbai Refinery

HP NanOKoat

Nano-Additized Paint for Corrosion Mitigation

Advantages

- ❖ Tested under Extreme Salty conditions
- ❖ Compatible with Any surface
- ❖ Superior Adhesion Properties
- ❖ Potential as a Marine Paint

Performance Evaluation

- ❖ Sustained > 1000 h of Accelerated Corrosion Test – ASTM B117
- ❖ Sustained > 120 Days exposure to Salt Water Spray
