

HP ThermoPro

A Novel Antifoulant for Preheat Exchangers

- ❖ Fouling of refinery process equipment resulting in severe energy loss along with reliability & asset integrity issues

- ❖ Refineries strive for reliability and processing flexibility with minimal equipment fouling and off-line cleaning
- ❖ HP ThermoPro is a unique combination of Dispersant, Corrosion inhibitor, Metal deactivator and Antioxidant

Single formulation for all Crudes and Short residues

Sustains Pre-heat temperatures

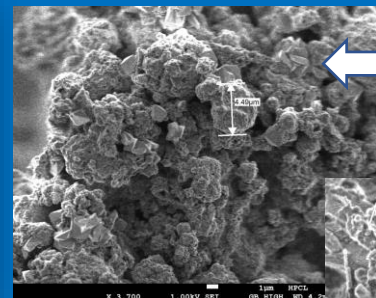

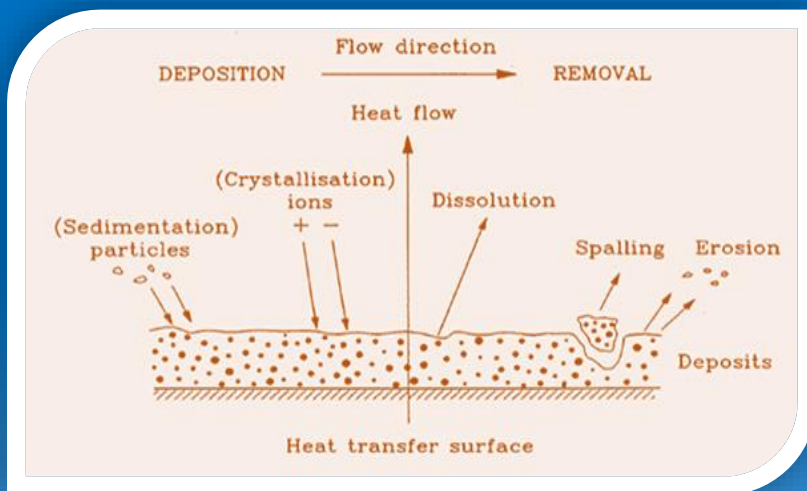

Reduces exchanger off-line cleaning

Reduces carbon footprint

HP ThermoPro

A Novel Antifoulant for Preheat Exchangers

- ✓ HP ThermoPro is a unique formulation effectively controlling all types of fouling mechanisms
- ✓ Ensures consistent performance with varying crude process cycle and Crude origin
- ✓ Reduces Scale particle size by 85% and fastens off-line cleaning

W/o Antifoulant

ThermoPro
