

A green antimicrobial coating for any surface

## ✓ Importance of Hygienic Indoor Environments

- Critical in combating the ongoing Covid-19 pandemic.
- Many transmissions occur through microbe-contaminated surfaces.
- Continuous disinfection is challenging and not always feasible

## ✓ HP-INVIUS: Developed by HPGRDC

- Universal applicability on various surfaces.
- Offers **excellent antimicrobial efficiency** and **high durability**.
- Provides long-term protection against virulent microbes.

A green antimicrobial coating for any surface

## Salient Features

- ✓ Anti-fogging properties prevent fog formation on spectacles, car windshields, and other transparent surfaces
- ✓ Safe & Eco-friendly
- ✓ Non-toxic and environment-friendly formulation.
- ✓ Safer alternative to common disinfectants like hypochlorite, bleach, peroxides, and quaternary ammonium salts
- ✓ A Key Solution in the Fight Against virulent strains like Covid-19
- ✓ Novel formulation with multiple benefits
- ✓ Contributes to maintaining safer indoor environments
